

Rolls

Fabric Handling Solutions

Rolls develops and builds efficient and individually engineered machines for the textile industry, especially focussed on the handling of all kinds of fabrics:

- carpets
- woven and non-woven textiles
- technical textiles

A choice can be made from a whole range of machines, from standard machines up to custom-made solutions:

- Ancillary equipment
 - unwinders
 - winders
 - inspection units
 - accumulators
 - brushing machines
 -
- Cutting and converting
 - slitting
 - cross-cutting
 - perforating
- Packaging
- Special machines
